

Landscape Rehydration Field Day

**31 October
2025**

9am – 3pm

Water heals landscapes!

Learn how to read water processes to interpret landscape health. Discover the strategies that deliver results. This introductory Landscape Rehydration Field Day supported by Lithgow Oberon Landcare Association and presented by Mulloon Institute provides a foundational understanding of a farm's water cycle and our approaches to rehydrating rural landscapes.

Explore a range of strategies including natural structures that can optimise a farm's water cycle and improve landscape function.

The Lithgow Oberon Landcare Association (LOLA) assists with the co-ordination and ongoing development of Landcare and natural resource management strategies and activities including revegetation works, bushland regeneration, and sustainable agriculture farming across the Lithgow and Oberon Local Government Areas.

Presenters

Erin Healy
Environmental Engineer
+ Program Manager

Tony Wells
Landscape Planner

Venue

Hartley Vale, NSW.
Address supplied upon registration

Cost

FREE *limited numbers*
