This introductory Landscape Rehydration Field Day presented by Mulloon Institute is supported by Central West Local Land Services and Three Rivers Landcare.

An on-farm session that will provide a foundational understanding of a farm's water cycle and our approaches to rehydrating rural landscapes. Learn how to read water processes to interpret landscape health. Explore a range of strategies including natural structures that can optimise a farm's water cycle and improve landscape function.

Mulloon Institute is a leading research and education organisation helping to build resilient regional communities by supporting the long-term, sustainable growth of Australian agriculture.
